Never played so much crap, It feels like a game programmed by a 12 years old kiddie. Dont buy this its not worth it. Refund incomming.. A great MP game if people actually played it. actually the is fun and the game has fine graphics i will rate it 8V10. Selection is terrible, mechanics get stale and repetitious and there's a lot of boring downtime between bosses. Feels like a game still in alpha.. Giving this a thumbs down makes me sad, but I can't recommend this game.

The short of it is that the creative direction, art, and innovation were amazing, and honestly what caught my eye to buy the game; this was consistently great throughout. Gameplay execution, enemy, fight, and level design had major flaws that made it boring, unfair and frustrating in ways that it shouldn't, such as the necessity for frame perfect execution of the slide kick if you want to use it as intended (and as is necessary for blocking the charge of the final boss), or random instances where your invulnerability suddenly doesn't matter.

I am excited to see the next game, but beating this game just did not feel good.. Very fun and easy to play :-). It's not bad, but its not super good. id say it was worth the money, and it was fun. looked good to for a 7 buck game.. This is a great simulator. It has lots of shells to work with. The display graphics are great if you have a 2Gb video card or better. The only limitations are as follow: You can't use artists mp3 as background music then post it to certain social media due to copyright laws and You only have two locations for launching fireworks. You launch from either bardges or a golf course. If you forget and create a display with an artists music some social media will remove it and warn you about breaking copyright laws.

Its like a little gaming snack. Fare worth 5\$ [?][?][?]. My fault for not checking what was included, but I expected DLCs. Regardless, what you do get from this upgrade is not worth it.. It's an interesting take on the raising monsters\VRPG kind of format. There's good replayability, and a good amount of choices you can switch around on different playthroughs. Being able to change how the different monsters turn out based on how you train them is neat, even if they don't always end up with the results you were going for.. Can't believe i've actually played this type of game, it's so addictive!

I've never thought i would play a game like this one, but it was worth it, i recommend!. Just like what it says: Get in, get out, get paid.. Wanted to buy Vegas Pro originally, but gave this software a chance since it\u2019s cheaper. Surprisingly, this software is more than enough for editing my videos and pretty easy to master too! I did not encounter any crash or lags while using this for 2 hours straight so I say give this software a go, if you don\u2019t like it just refund it.. Definetly love to play this game. And this is not even its final form!!!

Tons of fun while playing it either with friends or by yourself (Challenges are amazing if you are playing this game on your own)

Really looking forward for the tournament and endless modes that are currently work in progress. In the mean time, the developers are really working on it releasing patches with fixes and some new features.

Very cheap, there are no reasons not to buy this. A must for everybody that likes local multiplayer!!. I found this game to be overall very enjoyable in short 30~40 minute bursts. The character design is excellent and the music is great and the storyline and dialog is very well written. It\u2019s not the sort of game you spend 4 hours a day playing, it leans more to the casual \u201cwaiting between college classes\u201d side of gaming. Highly recommended for anyone who is a fan of youkai (\u5996\u602a).
